

Windows of Opportunity

Could migrating to Windows 10 accelerate your digital transformation?

When Microsoft ends support for Windows 7, an upgrade to Windows 10 will be inevitable. But it's also the ideal time to implement a virtualized client environment. Do it right, and you could turn your upgrade into a springboard for digital transformation.

Why make the leap?

Realize the benefits of enhanced security, productivity and lower management costs. Transform your IT with easy-to-scale deployment and comprehensive centralized management, while supporting anytime, anywhere, any device working.

Organization leaders get improved security

Store data securely at the datacenter

Implement fast & comprehensive patches and remove known vulnerabilities

Automatic data backup aids disaster recovery

Eliminate malware with a clean OS for every login

IT decision makers get improved efficiency

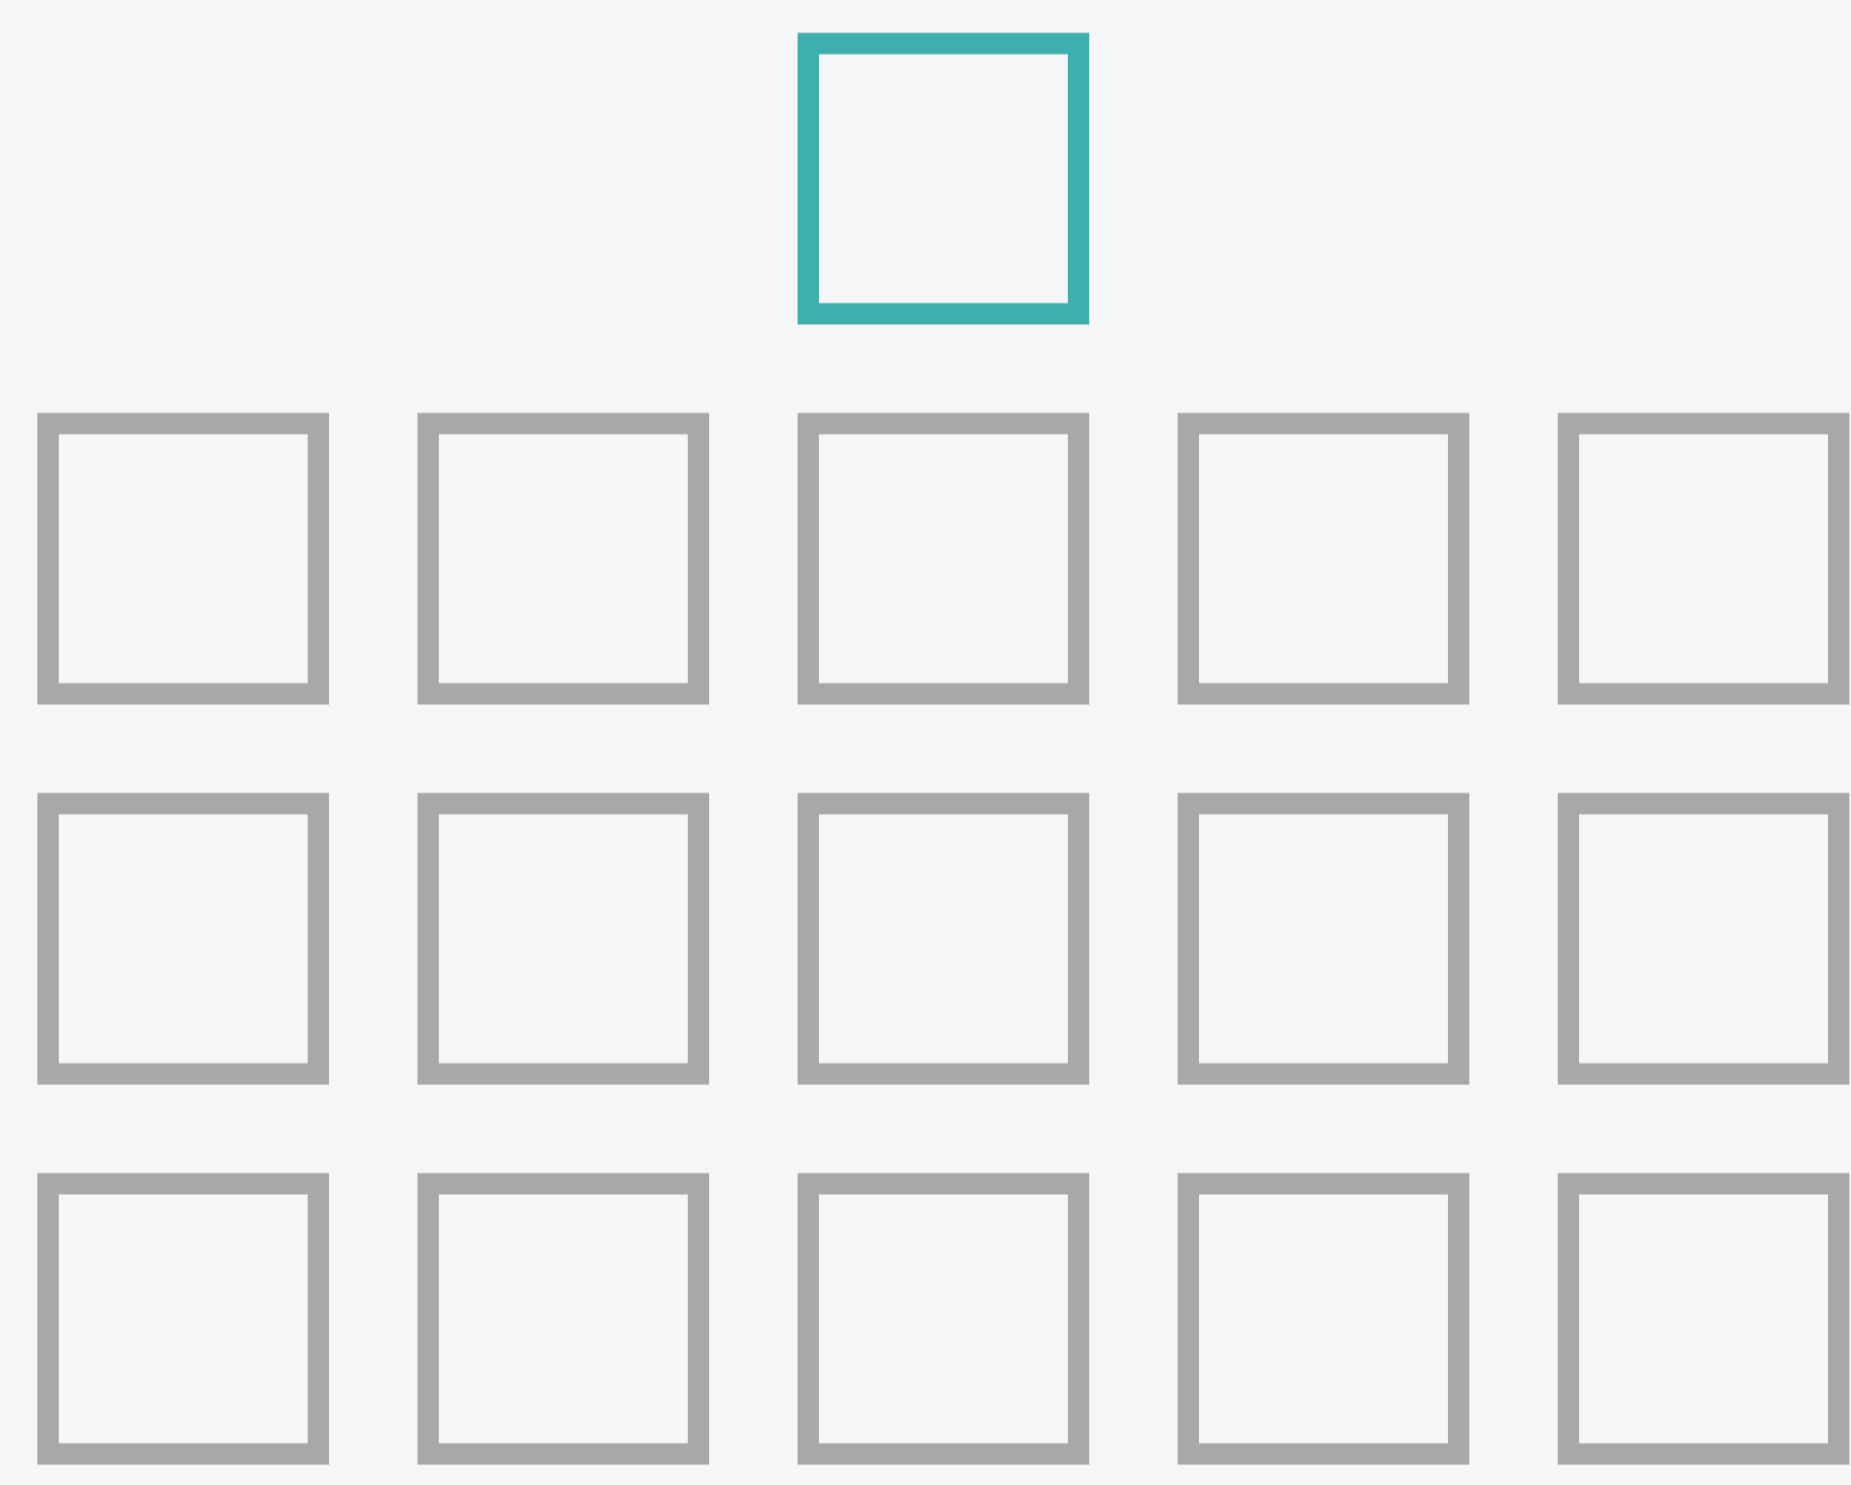

Use up to **90%** less power with virtual clients*

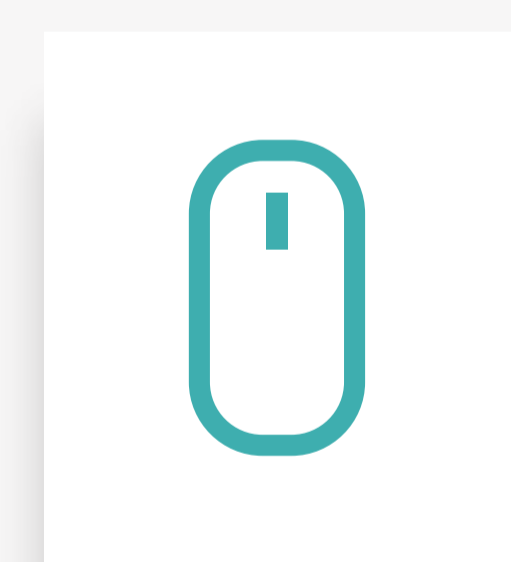

Spend around **46%** less on new hardware and software*

Reduce your IT incidents by **50%** and resolve them faster*

One IT resource can manage up to **15X more endpoints***

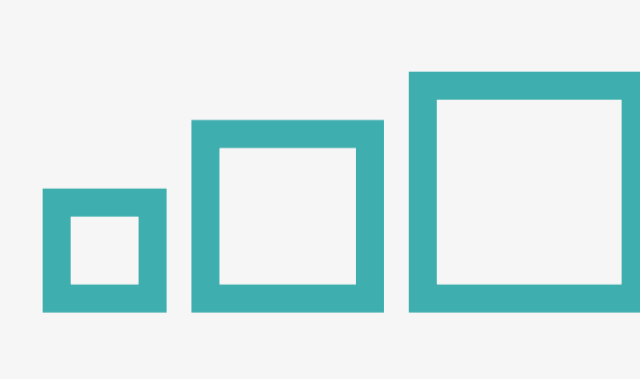

IT administrators get improved productivity

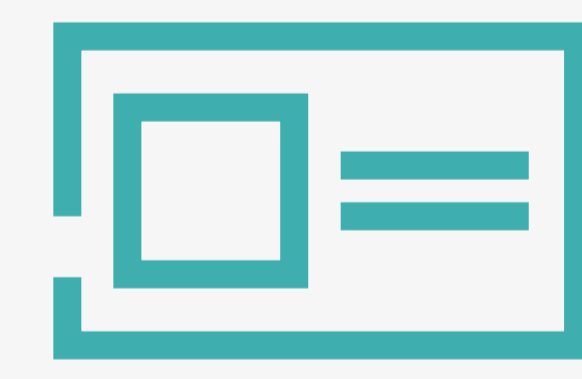

Build virtual desktops remotely – avoid desk-side visits

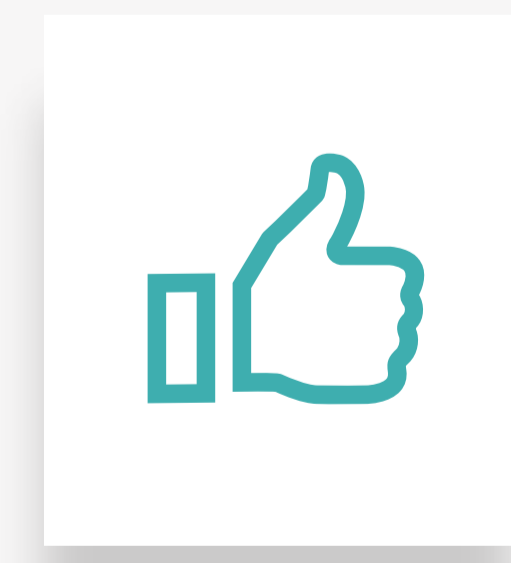

Test and update OS and applications updates centrally in one operation

Scale your virtual environment quickly and affordably

Manage licenses from a single central location

End users get a flexible, improved user experience

Work anywhere there's a network connection

Securely access centrally stored data, remotely from any device

Port a desktop session from one device to another

Work seamlessly, flexibly and on any device

Windows 10 runs faster and deploys more easily in a virtualized client environment.
